Creating Theater Retreats, Lighting Environments, Safety & Security One Home Or Business At A Time

The Partner's Place

Hello friends. We are well into the hot Arizona summer; I hope you are all faring well. I am sure many of you are taking well-deserved summer vacations and spur of the moment jaunts to the cool mountains of Arizona.

A quick reminder about security: make sure all of your doors and windows are locked before you leave town! Burglars have become more sophisticated and many are just waiting for you to leave to make their move. Lock down the house and arm the security system. If you don't have a security system give us a call and we can take care of your security needs.

Have you ever seen those "Christmas in July" sales at some retail stores? I believe my daughter has because just last week she presented her first official Christmas wish list to my wife. My unsuspecting wife thought that her young daughter had left her a sweet love note, little did she know. Most retailers who hold those sales have seen that revenues really drop dramatically during the summer months and thus they try to attract more business. Wouldn't it be nice if life were that way?

Truth is that most of us are busy year round. Calendars always seem to be full and before you know it the holidays have arrived. During the first quarter of this year I spoke about goals. Don't let your goals slip away. Remember that you can always enlist the help of others when trying to achieve your goals. If your goals are home electronics related items Components can definitely help. If your goal was weight loss you are probably on your own. Also, if you are looking for a referral for something around your home that Components can't handle, feel free to contact us to make an inquiry. Our focus on quality workmanship puts us on constant lookout for trades that provide excellent products and services. We would be glad to point you in the right direction.

Until next quarter, stay out of the Arizona sun and drink plenty of water.

Jason C. Evans, CEO

Employee Spotlight...Katie Evans, President

Katie is a graduate of Brigham Young University. Her vast work experience in professional offices helps Components stay organized and efficient. While you may not see her out in the field, you will hear her voice on the telephone as she coordinates and accomplishes many of the essential operations of a well-run business. Katie is almost an Arizona native, having moved here on her first birthday from Texas. She is married to Jason and they have one daughter named Katelyn. She enjoys reading, scrapbooking, swimming, and being a mother and an aunt.

iPod Port

Creating theater retreats, lighting environments, safety and security one home or business at a time.

Technology News

Well, I am sure that many of you have become part of the iPod craze that seems to be sweeping the nation. As you may have seen, iPods are available in many varieties and sizes. Along with the iPod craze many manufactures have released docking stations so you don't have to walk around with headphones on in order to listen to your music.

Did you know that your iPod could also be part of the distributed audio system in your home? In fact, if your home was wired by Components during the past 2 years it is very likely that it was wired for an iPod port (see picture above). This "port" allows you to dock your iPod, charge it, and play your music through your distributed audio system. Even if your home wasn't wired recently an iPod port may be an option. Give us a call!
