### THE PARTNERS PLACE

Dear Friends,

Do you remember your first Arizona summer? Mine was when I was 13 years old. My family had just moved to Arizona from the Midwest, Illinois to be exact, like so many others. It was late spring, the school year was about to finish, and the mercury was already spiking well above 90 degrees and sometimes above 100. It was then that I realized that ghost towns really do exist, or at least it seemed that way to me. Where did everyone go? Back in Illinois all the kids

played outside during the summer, riding bikes, building forts, etc., but here in Arizona the streets where empty, tumbleweeds and all, just like a ghost town. After a few scorching days I soon understood why and quickly grew to appreciate the comforts of an air conditioned home.

While having an air conditioned home, cars, offices, etc. is an essential part of life in the Arizona deserts it doesn't mean that we should have to completely give up

outdoor living during the summer months. In this newsletter we will take a look at how to better experience your backyard. Obviously we can't help with such things as pools and landscapes, but we can make being in your backyard (yes, even on hot summer nights) an enjoyable experience. Just imagine the backyard resort that awaits you. No longer do you need to be confined to the walls of your home! Your own personal retreat can be just a few steps away! Just let your imagination run wild and let us help.

Best regards,

*Jason Evans*

### HOW TO EXPERIENCE YOUR BACKYARD RETREAT

#### Are you tired of being trapped inside your home?

Would you like to get outside but the draw of your media room and computers keep you inside? Here are a few things that you can do to help you turn your backyard into a "backyard retreat" to enjoy with your friends and family.

Do you enjoy sitting pool side soaking up the sun drinking your favorite fruity drink, all while your favorite music is playing in the background out of a pair of invisible speakers. Well, maybe not completely invisible but, they are designed to blend in with your backyard decor disguised as rocks. These speakers sound great and are completely weather proof.

No more dirty hands from news print! Take your morning ritual of reading the newspaper outside wirelessly on your laptop. With a properly designed wireless internet you can enjoy the cool morning air while checking you email or surfing the web.

Party! Make your favorite sporting event party even better than before. With a weatherproof SunBrite LCD TV you

can combine your BBQ party with your sports party. Now you can sit back with your compadres eating your special recipe BBQ chicken and enjoy the high definition picture on your LCD TV accompanied by a pair of flush mount in ceiling speakers on your back patio. Remember you want to make all this audio/video equipment simple to control so you can get the most enjoyment out of it. With a single remote you will be able to control all aspects of your "backyard retreat" with single button presses.

Finally, quality components combined with a quality installation will lead to many hours of enjoyment. Let Components Electronic Systems help you turn your backyard into a "backyard retreat". With years of design and installation experience Components can assure that you, your family and friends will have many memorable hours spent outdoors.

## Employee Spotlight

Cort Zeigler is one of Components' newest additions. Cort, working as one of Components' Installers, comes to us after years of experience in both construction and electrical installation. Cort has been a great asset to the Components team and has continued to show quality and pride in his work.

Cort has been playing the guitar for nearly eight years and singing for six. In his spare time he enjoys relaxing, watching movies, camping and four wheeling. Cort takes great pride in knowing he treats individuals with respect regardless of their situation. This same respect is reflected in his work and dealings with customers on a daily basis.

Cort is recently married and he and his wife Jessica live in Chandler. Together they have a pet turtle named Herkemer. Cort likes Chinese food, baby-back ribs and prides himself in being a decent cook.

Components is proud to have Cort as part of the team and looks forward to each of our customers experiencing his outstanding work and customer service.

**In June of this year, SunBriteTV™ introduced their new All Weather Outdoor LCD Television. This television comes in a 23", 32" and now in a 46" screen size.**

### WHAT'S NEW...SUNBRITE TV

One of the reasons that most of us enjoy living in Arizona is the "outdoor lifestyle" that we get to live for most months out of the year. Even in the summer heat we get outside into our pools or under our covered patios equipped with water misters as much as possible. Because we here at Components love the "outdoor lifestyle", we were excited to hear of a new product introduced by SunBriteTV™.

In June of this year, SunBriteTV™ introduced their new All Weather Outdoor LCD Television. This television comes in a 23", 32" and now in a 46" screen size. *These all-weather outdoor LCD televisions are designed for permanent outdoor residential and commercial installation.* The corrosion-resistant, powder-coated aluminum exterior protects the internal TV components from rain, dirt, insects and other outdoor elements. A contrast-enhancing, anti-reflective and scratch resistant window protects the LCD screen from rain, dirt and the elements.

So, what makes these televisions any better than any other TV for outdoor viewing? SunBriteTV™ tells us that *the #1 difference is SAFETY.* These televisions are designed for safe operation in a permanent outdoor environment and all the electrical cords are rated for outdoor use. It also uses an innovated wa-

cords are rated for outdoor use. It also uses an innovative watertight cable entry system with a pass-through design that keeps cables dry and allows for easy hook-up.

SunBriteTV™'s offer a Super Brite, 800 nit brightness. Compare that to the average LCD TV that ranges from 350 – 550 nits of brightness. *This gives you virtually twice the brightness for outdoor viewing.* Heat is also an issue for outdoor components. These TV's have a baffled and filtered, dual-fan airflow system that keeps the unit cool and dry in all environments.

With all these fantastic features, we came up with a ton of places we wanted to put these televisions around our backyards. Try one by your hot tub, under your covered patio by the grill, or how about mounted out by the pool for "dive in movies" with your friends and family.

We, hope you are enjoying the Arizona sun and warmer months and we hope that you are able to enjoy all that the "outdoor lifestyle" has to offer. If you have any questions about this or any other product that can be used in your home, please do not hesitate to contact us.

*For additional information on any SunBrite TV or accessories email [customerservice@componentsaz.com](mailto:customerservice@componentsaz.com) & note SunBrite TV in the subject line. You will receive a coupon for 10% off the purchase of any SunBrite TV or accessories good thru 12/31/07.*
